	<i>ENVIRONMENTAL POLICY DOCUMENT</i>		10/01/2014
	Summary document		Rev 0
			PAGE 1 OF 1

The Environmental Policy is a declaration of intent, with which Rei Tregi Srl undertakes to pursue continual improvement of its environmental performance in carrying out its business activities and to achieve and maintain complete environmental legislative compliance.

The Environmental Policy takes into account the environmental aspects of the Company and therefore represents the benchmark to be used for each future decision.

Its commitment to the environment is not simply a formal intent within the Environmental Policy document, as it implies the carrying out of concrete actions, technological investments and boosting awareness among its employees in order to achieve the objectives that the company intends to pursue.

The key aspects on which the company intends to focus on in order to safeguard the environment and those it is committed to ensure continual improvement, can be summarised as follows:

- engaging in an active role in protecting the environment when performing its activities, fostering all measures aimed at preventing pollution and promoting environmental improvement objectives with a view to achieving sustainable development of its work operations.
- maximum commitment in the application of the most functional production process control measures to prevent any possible environmental damage arising from its activity.
- Top Management is committed to pursue technological development, with targeted investments, which allows increased attention to be paid to issues related to environmental protection, the reduction of energy consumption and the use of renewable energy.
- maximum commitment to the maintenance of its equipment to maintain high performance and reduce energy waste.
- an accurate and attentive management of company waste.
The management of company waste is a fundamental aspect for the company that requires utmost attention and whose main objectives can be summarised as follows:
 - reduction of waste destined for disposal implementing a targeted differentiation system that ensures the recovery and recycling of as many resources as possible
 - adoption, as a waste producer, of suitable technical and administrative management in compliance with the laws and directives currently in force.
- Rei Tregi Srl is committed to promoting particular environmental awareness among all personnel, with training, information and knowledge about their professional activity, both for personal protection and the environment in general.
